EMPLOYEE SAFETY & SECURITY

SITE & ASSET PROTECTION

RESILIENCE OPERATIONS

LONE WORKER PROTECTION

TRAVEL RISK MANAGEMENT

ON-SITE PEOPLE ACCOUNTABILITY

GLOBAL TO LOCAL SITE SECURITY

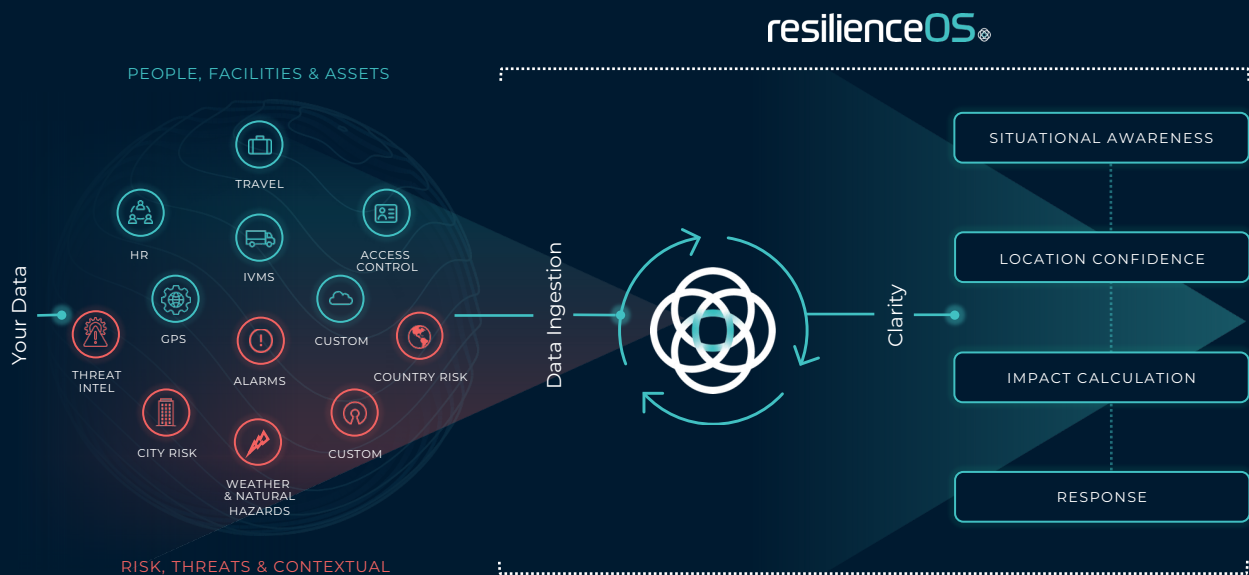

MOBILE ASSET MONITORING

INCIDENT & CRISIS MANAGEMENT

resilienceOS is an end-to-end operational resilience platform with your data at its heart. Modular, scalable, and built to function at a global, regional, local, or site level. resilienceOS is an open platform that adapts to the way you want to operate, providing a better way to protect your people, assets, and organisation.

Trusted by the world's industry-leading companies:

Your operational goals. One **resilience** platform.

Rather than rely on a fragmented patchwork of systems and data, resilienceOS brings clarity to your organisation, empowering you to:

UNIFY YOUR DATA

Centralise all your critical data, transforming it into actionable intelligence for faster, smarter decisions.

GAIN INSIGHTS

Cut through alert fatigue by prioritising threats with smarter filtering, custom workflows and 24/7, automated risk impact assessments.

TAKE ACTION

Equip your crisis team with everything they need to triage risks, send emergency alerts and manage critical incidents.

LOCATE

Locate and protect everything that matters.

MONITOR

Understand the real risks to your organisation. Faster.

RESPOND

Triage threats quicker. Streamline your emergency response.

COMMUNICATE

Deliver smarter critical communications.

CONNECT

Enhance the safety of your workforce, wherever they are.

“The ability for us to take data that is flowing in from multiple external providers, and integrate and visualise that data seamlessly with resilienceOS, gives us the exact outcome we were looking for.”

Director of Global Security & Administration

“Restrata’s solution is a critical leap forward for safety in our industry. Real-time data from our sites provides the visibility needed to optimise operations, improve decisions, and save lives.”

Group HSEQ Director
