

# resilienceOS®

## Built for Connected Resilience

Open, unified resilience platform that empowers organizations to see, decide, and act across people, facilities, supply chains, and information assets, in real-time.

EMPLOYEE SAFETY & SECURITY

SITE & ASSET PROTECTION

RESILIENCE OPERATIONS

Built from the ground up - by operators, for operators - with your resilience in mind.

**Modular. AI-Embedded. Flexible.**  
A true system of record for resilience.

Trusted by the world's industry-leading companies:

# resilienceOS<sup>®</sup>

## Powering Connected Resilience

A state where every threat, data point, process, and operation is seamlessly connected, giving organisations the clarity to prepare better, respond faster, and recover stronger.

Customers can switch modules on or off, plug in their own providers, or build on open APIs. From enterprise-wide to project-level operations, **resilienceOS adapts to you.**

### UNIFY YOUR DATA

Centralise critical data into actionable intelligence for faster, smarter decisions.

### GAIN INSIGHTS

End alert fatigue - smart filters, custom workflows, 24/7 risk impact assessments.

### TAKE ACTION

Arm your response teams to triage risks, send alerts, and act on critical events.

*"resilienceOS gives us a multi-dimensional view of our risk profile. It integrates threat intelligence, travel records, access control data and other feeds into one operating picture. **resilienceOS saves us hours in time and is a force multiplier for our global security team.**"*

VP Global Security at Helmerich & Payne
